|  |           |
|--|-----------|
| Kuznetsov E. D., Sali S. V., Polushina T. S. Polina Evgenievna Zakharova . . . . .   | 6         |
| Sokolov L. L., Shaidulin V. Sh. In memory of Konstantin Vladislavovich Kholshchikov . . . . .  | 22        |
| <b>Students talks</b> . . . . .  | <b>26</b> |
| Balakina E. A., Pruzhinskaya M. V. Peculiar velocities of supernovae Ia in clusters of galaxies . . . . .  | 27        |
| Gorbachev M. A., Butuzova M. S., Nazarov S. V. Color characteristics of the blazar S5 0716+714 under geometrical origin of the long-term variability . . . . .                       | 30        |
| Zozulya V. D. Galactic bars: a look at the point of view of action variables . . . . .   | 34        |
| Korchagina E. P. Analysis of photometric observations of the variable HS 2231+2441 . . . . .   | 39        |
| Kulesh M. V., Seleznev A. F. Method for determination of cluster radius from radial density profile . . . . .  | 42        |
| Lisitsin D. D., Kuzin A. V. Identification of extragalactic star forming complexes . . . . .   | 46        |
| Markozov I. D. Modeling pulse profiles in X-Ray pulsars with accretion column . . . . .  | 50        |
| Medvedev M. G., Ostrovskii A. B., Vasyunin A. I. Stochastic on-lattice simulation of H <sub>2</sub> formation on interstellar grains . . . . .                                       | 54        |
| Nikonov I. N., Zhuchkov R. Ya. Photometric calibration of 28-cm telescope of NCAS KFU by jointly modeling equations of transformations and the extinction . . . . .                  | 58        |
| Permyakova T. A., Loktin A. V. Study of possible regularities of the metallic distribution of open cluster stars according to the LAMOST catalog . . . . .                           | 62        |
| Petrashkevich I. V., Punanova A. F. Deuterium fraction in cold dense cores in the star-forming region L1688 . . . . .  | 64        |
| Smirnov D. V. Active galactic nuclei among the polar-ring galaxies . . . . .   | 68        |
| Suslikov M. V., Kolbin A. I. Determination of the parameters of polar V379 Vir components, magnetic field and accretion . . . . .  | 72        |
| Shmidt E. E., Bانشchikova M. A., Avduyshev V. A. Investigation of nonlinearity in inverse problems of satellite dynamics . . . . .   | 76        |
| <b>Contributed talks</b> . . . . .   | <b>79</b> |
| Avtaeva A. A., Shematovich V. I. Estimates of non-thermal atmospheric loss of exoplanet GJ 436b due to dissociation processes H <sub>2</sub> . . . . .                               | 80        |
| Baluev R. V. Wavelet analysis algorithm for bi- and trivariate statistical distributions . . . . .   | 83        |
| Balyaev I. A. Mass calculation of asteroid collision probabilities: methods, pitfalls, comparison of results . . . . .   | 87        |
| Bikulova D. A., Nazarov S. V., Khovritchev M. Yu. Astrometric observations of Uranian and Neptunian satellites with the Pulkovo and Crimean observatory telescopes in 2020 . . . . . | 89        |
| Borshcheva E. V. The three-phase astrochemical code: modeling of the molecular cloud composition . . . . .   | 93        |
| Vasileva M. A., Kuznetsov E. D. Investigation of the dynamic evolution of Hobson asteroid family . . . . .   | 97        |
| Galushina T. Yu., Levkina P. A., Letner O. N. The precision of the orbit fitting for selected NEAs from positional observations at the Terskol Observatory . . . . .                 | 101       |
| Gorda S. Yu. Cyclicity of variations of the magnetic field of the eclipsing variable AM Leo . . . . .  | 103       |
| Deminova N. R., Shimansky V. V., Borisov N. V., Bikmaev I. F., Gabdееv M. M. Research of the characteristics of the close binary system SDSS J162256 . . . . .                       | 107       |
| Dryomova G. N., Dryomov V. V., Tutukov A. V. Interstellar planets . . . . .  | 111       |
| Zhuzhulina E. A., Savushkin A. A., Petrov D. V. Study of polarization properties of comets by the method of aperture polarimetry . . . . .   | 115       |
